

## Easton EMS 2020 Fundraising Campaign

**N95, Zoom calls, social distancing.** These are all now too familiar and like you we anxiously await when they become less relevant in our lives. The good news is that there now seems to be light at the end of the tunnel with recent announcements on the development of a COVID-19 vaccine.

We are reaching out to you for our annual year-end fundraising appeal. Every day the volunteer members of the Easton Volunteer EMS respond to life-threatening emergencies. Thanks to your generous donations we have had access to critical training and procurement of life-saving equipment to ensure the highest level of patient care and treatment for you and your loved ones in times of need.

Once again, we are asking you to join our fundraising effort by making a tax-deductible donation. This year 20% of your contribution will go to our capital development fund to replace our aging building. Our current headquarters is almost 100 years old. While it has served us well, Easton EMS has outgrown it. It may be several years before a new building comes to fruition, but we have to start now. Go to [www.eastonems.com/donate](http://www.eastonems.com/donate) to make a donation.

**With your help we will continue to proudly fulfill our mission to serve you and the town of Easton.**

With heartfelt gratitude, thank you for your support!
